

GRAND RAPIDS TRIBUNE.

Grand Rapids, Wisconsin, Wednesday, June 12th, 1907.

VOL. XXXIV, NO. 7

DRUMB & SUTOR, Publishers.

The Time, The Place and The Events.

The Time is Now, the Month of June and July

The place is Grand Rapids and the surrounding country.

The events are the terrible cyclones, tornadoes, windstorms and electrical storms you are reading of in every day's paper.

Thousands of dollars worth of property are being destroyed and hundreds of lives lost almost daily.

You cannot afford to risk losing your property without protection.

I will protect your city property against tornadoes and windstorms for the small sum of 40¢ per \$100.00 for a term of 3 years.

Farmers I will protect your farm buildings against these same storms for 75¢ per \$100.00 for three years.

Or I will insure your buildings, stock, machinery, etc., against fire, lightning, tornadoes and windstorms for \$1.75 per \$100.00, for three years. No assessments.

Can you afford to take the risk of losing your property without protection when good protection costs so little?

I also buy and sell Real Estate, loan money and make Abstracts of Title.

C. E. BOLES,

Lyon Block

Preparing to Celebrate.

The members of St. Peter and Paul congregation are making big preparations for the celebration of the half century anniversary which will be held in this city on the 30th of June.

Committees have been appointed for the occasion and it is the intention to have some very impressive ceremonies.

Father Huguenot will be assisted

in the work by a number of other priests and Bishop Schwebach will be

here to help in the services. The

event will be a sort of a home coming

in a good many ways, and it is ex-

pected that a large number of the

people who have been members of the

congregation in the past will make it

a point to come back to the city and

take part in the ceremonies.

Band Concert.

The band concert tomorrow night will be on the east side, and the following program has been prepared for the occasion.

March—Field Bugler... G. Bramhall

Serenade—Cupid's Charms... Miller

Mussey Overture—Swanee River...

Frilly VonTilzer

AMERICANS WITH TITLES AND NEAR TO TITLES

Boston. "Some titles are bad and some titles are worse, but there are no good titles," a sarcastic American father is said to have exclaimed upon the marriage of a relative to a foreign nobleman.

He was not altogether right, nor was he altogether wrong. The old world is flooded with titles, good and indifferent. The bad and the indifferent greatly outnumber the good. American girls have some of the good, possibly more of the bad, and perhaps still more of the indifferent.

There is a heraldry office in London that spends all its time straightening out the kinks in the pedigree. With some 500 American women married to foreigners, duly handled as to their names, some of the freaks of aristocracy's mating are apropos.

In America it is self-evident that some children display it that a parent is superior to the child. Yet an American woman is on record to dispense the fact. The late widow of Isaac M. Singer married a soldier, Due de Campaudier, and later M. Paul Schoge, a plain Frenchman. But her daughter is Duchesse Decezeaux, among the French aristocracy, and Duchesse de Glueckskirk in the high lights of Denmark. If it isn't a case of daughter out-distancing the mother, it is the nearest approach to the truth.

Some of these daughters have become duchesses of England, princesses of Russia, duchesses of France, principesses of Italy, duchesses of Spain or Portugal, and still others have obtained titles of the Holy Roman Empire and papal titles by marriage. There are said to be about 500 of them all told, but how do they rank among each other? Where in the scale of high sounding handles to matrimonially acquired surnames doth rank Lady Tennessee, Lady Cook, who is the widow of an English baronet, and who, through him, is Viscountess Montserrat in the peerage of Portugal? And why does not she employ the higher Portuguese title instead of the inferior English one?

Peculiarities of Peacocke.

The truth is that peacocke are now worthy of but half respect. Only two of them are really to be very seriously taken, the English and the duchies confined to the mated Teutonic families. And the latter of these is not open to American ambitions, as Miss Mary Wister Wheeler of Philadelphia discovered in 1890, when she was married to Count Maximilian Papenheim, of that ilk, and learned when Herlin heard of the event, that she could never be more than a mere paragon wife.

Recently it transpired that English titles are not always exactly what they seem. It came out that one peerage was obtained by the typically American practice of contributing to a political campaign fund. It took \$1,250,000 in that case to make a baron of the United Kingdom, and at the same time \$150,000 was required to secure a knighthood that labors under the disadvantage of not being heritable. Scandal aside, however, the British peerage is the best of its kind. An American girl looking for foreign honors can better realize her ambition in marrying a mere English baronet than by contracting half a

barn cat, a Prince Dolgoruk who is a scoundrel, or a Princess Galatina in a fourth rate circus.

A Delverd ancestor was once king of Russia, and the Galatina and Krapotkin families are among its most honorable and ancient. Occasionally a "zakhindzha kuzza" has fallen so low that he is but a peasant, and then minus the title of noble that is given to the educated subjects of the czar.

This Russian disregard of primogeniture observance, which does so much to keep the English peerage up to the standard, obtains also in Germany.

Certain immunities and privileges, besides the satisfaction of defined precedence, make the English Jord a marked and envied nobility. Most German and Prussian nobles are devoid of extra privilege, and their children all bear the titles of their fathers.

The house of Hatfield is one of the fairest numerous exceptions. The heir of Prince Alfred, present head of one branch, is Prince Francis, whose wife was the adopted daughter of the late Collis P. Huntington. On the other hand, the late ambassador to Germany was only Count Hatfield. His case was particularly interesting because he had a genuine love affair with an American woman, Miss Helen Mouton of Albany. He married her in 1882, and was forced to separate from her by Prince Bismarck, who made it a rule never to allow a German diplomat to marry a foreigner. The separation lasted until Bismarck went out of power, when the two promptly remarried.

Many Times a Duchess.

There is one American woman who is a duchess in four countenances. This is the Duchesse de Dino, who is the same of Talleyrand-Perigord and of Valençay in France, and Prussian duchess of Sagan.

Titles in Italy date back a long time, and had their origin in the times when there were free cities, each of which had its own collection of nobility. The title of prince there is not awe-inspiring, and the others of lower grade fall far short of honor. The Italian equivalent of Burke's Peerage will look up your ancestry, determining your heraldic bearings and include a history of your origin in its next edition for a nominal sum.

The Vatican grants titles. The parvenus work so hard getting titles unto themselves that really respectable nobility have got out of the habit of using their legitimate ones. Prince Ferdinand Colonna married Miss Eva Bryant Mackay, but in that family the title is disregarded. They consider it really more aristocratic to call each other simply "Don" and "Dona." The Rousholt and Ruspolin families, which together number nearly a dozen American women among their wives, are aristocratic and as particular.

Long String of Honors.

Yet even persons with the plain name of John Smith will very likely be half a dozen kinds of dukes, spelled according to the genius of their geographical situation. There are dukes in England who are real aristocrats. When, therefore, an American girl, Miss Zimmerman of Cincinnati, captured the heart of his queen of Manchester, she got a titular matrimonial prize.

French Dual System.

There are dues in France, but their only value is as contributors to the government's income, by the scarcely graded scale that puts more of a price on them the farther up they go. One exception may be made to this general rule, for the royalists still hold titles, and to them a title is in itself with meaning and dignity.

The fourth Due de Dino, who unsuccessfully indulged his predilection for American wives on two occasions, would be entitled to enter this society, and either she who was born Elizabeth Curtis of New York or the previously divorced wife of Frederick W. Livingston could have accompanied him during their reigns over a heart whose unhappiness became rather well known at divorce court.

The royalist society constitutes the worth of a French title, but only two peer, coat, or all titles of La Belle Poche and elsewhere in France are legitimate. The others are jokes.

His Turkish Title.

In all except the mated families—formerly royal German families—there are women to represent the greatest country without a nobility. Even at Constantinople, where you can buy the order of Osman and the lower grades dirt cheap, there is one of our women. She has had the wings of her dignity clipped, but she is still Margaret Fehim Pasha.

Her husband was, till a few months ago, chief of the Yildiz secret police. Likewise a distant relative of the sultan. The German ambassador is seated to a little pleasure of his and Fehim is now in real exile. His wife, who was a circus rider, married a week after recontre, is still the wife of a pasha. That dignity isn't worth much, and in the matter of value of titles Turkey, for once, agrees with the rest of Europe.

A Russian Prince is a travesty on language, actually and literally.

Presently, he isn't a prince at all, according to respectable English standards, but the Almamego de Gothic misinterpreted the word "kazza" that way, and the mistake of significance has persisted like the Almamego. Its correct English synonym is lord. The incident that led to the present English confusion occurred at Paris, where a presumption one of these squires appeared at Louis XIV's court. Etymologically, however, "prince" is the proper rendering.

Russian Prince's Plight.

Prince Michael Cantacuzeno, who married Miss Julia Dent Grant, is one of these, but he has escaped the additional title, a "kazzaed-out prince."

Every member of the family of a Russian kuzza is a kuzza, male or female.

Count up a generation or two in mathematical terms, and it will not be surprising that there is a bona fide

Prince Krapotkin driving a Peters-

bury cab, a Prince Dolgoruk who is a scoundrel, or a Princess Galatina in a fourth rate circus.

A Delverd ancestor was once king of Russia, and the Galatina and Krapotkin families are among its most honorable and ancient.

Occasionally a "zakhindzha kuzza" has fallen so low

that he is but a peasant, and then minus the title of noble that is given to the educated subjects of the czar.

This Russian disregard of primogeniture observance, which does so much to keep the English peerage up to the standard, obtains also in Germany.

Certain immunities and privileges, besides the satisfaction of defined precedence, make the English Jord a marked and envied nobility. Most German and Prussian nobles are devoid of extra privilege, and their children all bear the titles of their fathers.

The house of Hatfield is one of the fairest numerous exceptions. The heir of Prince Alfred, present head of one branch, is Prince Francis, whose wife was the adopted daughter of the late Collis P. Advertising Rates.—For display matter a flat rate of 10 cents an inch is charged. The columns in "The Tribune" are 24 inches long, making a one column advertisement cost \$1.20 for one insertion. All local notices, cards of thanks, resolutions of respect, and all notices of entertainments where an admission fee is charged will be published at 5 cents per line.

The Drift to Radicalism.

As a result of the introduction of universal suffrage the Socialists made heavy gains Tuesday in the Austrian elections. The general political current toward Socialism or semi-Socialism which had pervaded the rest of Europe was bound to find its way into Austria as soon as the working classes were admitted to the suffrage.

The spirit of the times can neither be ignored nor suppressed. Everywhere the tendency is toward legislation in favor of the workingman and the poorer masses and against mere capital. Sympathy with labor is not only pronounced at the polls but finds expression in laws and methods of administration. Under the newer forms of industrial growth democracy is taking this turn. No government pretends to exist by popular support without making concessions to the workingmen and seeking to promote their welfare.

In Great Britain the Liberal Ministry under Campbell-Bannerman leans to radicalism in its programme of social reforms. Within the past year it has exempted the trades-unions from financial damages, provided for the protection of employees in case of accident and declared in favor of old-age pensions and lighter taxes on earned incomes. In France Premier Clemenceau stoutly defends the rights of labor and the unions even when forced to do so vigorously with Socialist leaders who seek to overturn the present order of things by violence. Germany is semi-autocratic in government, but the Kaiser and Chancellor von Bismarck, although savagely opposed by the regular Socialist party, appeal to the workingman with measures of reform and progress in the hope of winning him from Socialist influence.

It is absurd to imagine that the United States can be isolated. President Roosevelt frankly admits that if his ideas of state regulation of corporations and erection of trust laws do not prevail, capital must expect more radical treatment, but imposes on it the same obligation to respect the laws and the rights of others. To cry out against his general principle of equality as socialist is to cry out against the spirit that is today animating the progressive political parties of all civilized countries, under whatever name they may mask their purpose of retaining popular support through popular reforms. —New York World.

Disregarding the Law.

American Press.—"The Monon railroad ignores the interpretation upon the rate law by the interstate commission, combination and continues to pay for its advertising in transportation.

The Mobile Register understands that several of the roads in the south are preparing to follow the Monon example in the belief that the combination has no legal right to interfere in a business arrangement between a railroad company and a newspaper when such arrangement has absolutely no influence on any other provision of the act regulating railroads.

One of the local companies of Mobile, which withdrew all passes outside its own employees, has given an order to a printer for a sufficient number of certificates to meet the mutual business arrangements of exchanging advertising space for transportation.

There seems to be a growing sentiment throughout the state to have absolute Australian ballot system used at all elections of the state. The adoption of this system would do away with the casting of a straight ticket, but the voter would have to make a mark for each man he wished to vote for, which would indicate just how he stood on the matter. It is the complaint of many that often a man gets into office simply on account of his party carrying him in, while if the ballots had to be cast for him individually he would not be elected. Any plan that would get the sentiment of the voter would be what the people are looking for.

One of our exchanges complains that thousands of dollars are sent out of the state every year by young people who take courses in correspondence schools, when they could get the same instruction thru a correspondence course with the state university. It is possible that the university may furnish such courses, but the people should remember that the correspondence schools have spent a lot of money advertising, and they recognized the demand for such instruction so long before universities woke up to the conditions, that they got a long start in advance of their competitors.

Unknown Friends.

There are many people who have used Chamberlain's Cols. Cholera and Diarrhoea Remedy with splendid results, but who are unknown because they have hesitated about giving a testimonial of their experience for publication. These people, however, are none the less friends of this remedy. They have done much toward making it a household word by their personal recommendations to friends and relatives. It is a good medicine, which is a good medicine to have in the home and is widely known for its cures of diarrhoea and all forms of bowel trouble. For sale by Daly Drug & Jewelry Co.

The Old World and its Ways.

Col. William Jennings Bryan announces a new book of travel entitled "The Old World and its ways," which recounts his recent tour around the world and his journeys through Europe. It is profusely and elegantly illustrated with 210 artistic engravings representing men and things seen in the various countries of the earth during that noted journey. The engravings are made from photographs taken by him or his party specifically for this publication. He has, by special contract with his publisher, made the retail price low down with the view of putting it within the easy reach of every reader and book buyer.

The book gives his experiences—what he saw and did—whom he met and his impressions and conclusions. It made a profound study of men and things as he saw them in his noted journey around the world. He gives governmental, educational, religious and other conditions, from the standpoint of a student and one professedly interested in all the people of the earth.

Whilst Col. Bryan traveled as a private citizen he went with the prestige of having made two memorable contests for the Presidency of the United States, and he was everywhere recognized as a great representative American, having a leading part in the direction of American affairs. He was given opportunity for observations never before accorded to any one traveling in private capacity.

If one wants to see the world, and the people who are at the head of affairs in all countries, as well as the masses, he has in this book an opportunity of seeing them through the eyes of Col. William Jennings Bryan. It is sold by subscription, and the Thompson Publishing Company of St. Louis, Mo., are the fortunate publishers. They offer an especially inviting opportunity to collectors in another column of this issue.

They Go Hand in Hand. A preacher came at a newspaper man in this way: You editors do not tell the truth. If you did you could not live; your newspaper would be a failure. The editor replied: You are right and the minister who will at all times and under all circumstances tell the whole truth about his members, alive or dead, will not occupy his pulpit more than one Sunday, and then he will find it necessary to leave town in a hurry. The press and the pulpit go hand in hand with whitewash brushes and pleasant words magnifying little virtues into big ones. The pulpit, the pen, and the grave stone are the great saint-making triumvirate. And the great minister went away looking very thoughtful while the editor turned to his work, and told of the unsurpassed beauty of the bride, while in fact she was the bride, while in fact she was homely as a mud fence.—Ex.

Facts About the International Correspondence Schools of Scranton, Pa.

1. Capital invested \$6,000,000.
2. Cost of text books, \$1,500,000.
3. Amount spent on text books and instruction papers each year to keep them up to date, \$250,000.
4. Capacity of buildings at Scranton, 1 acre.
5. Cost of buildings \$550,000.
6. Number of Courses 208.
7. Number of students one million.

Advantages of the I. C. S.

1. You do not have to leave home to secure an education; the education comes to you.
2. You can keep right on with your work and study during spare hours. Our courses make odd moments profitable.
3. Our schools never close. You can begin to study when you please, and take your own time.
4. You can move from place to place while studying. We have students in every country.
5. You have text books to buy. We furnish all instruction papers, return envelopes and information blanks.

6. Our papers have been written especially for Correspondence Instruction by men expert in both the theory and the practice of their professions.

7. The I. C. S. is the only system that will lead you to complete education and experience by immediately using in daily work, all knowledge gained through your studies.

8. Our courses begin at the beginning and are complete in their respective lines. They are thus adapted to the needs of both men with limited educations and of technical graduates.

9. The prices charged are much smaller than the fees of other educational institutions. You can pay in monthly installments. We pay all postage on mail sent to students.

W. R. Ward, of Dyerburg, Tenn., writes: "This is to certify to you I have used Ortho Laxative, Frob. Syrup for chronic constipation, and it has proven, without fail, to be a thorough, practical remedy for this trouble, and it is with pleasure I offer my conscientious reference." Daly Drug & Jewelry Co.

Thirteen Year Locust.

This is the year of the "thirteen year" locust and southern and western states are likely to be overrun with this insect, according to the department of agriculture.

The agricultural department at Washington has issued a statement, however, saying that fear for the safety of shade trees and orchards from the past is unwarranted, as the actual damage will be slight except in the case of newly planted orchards and nurseries.

Will Visit This City.

Dr. Richard C. Hughes, president of Ripon college is in great demand this spring for commencement exercises at various high schools. He has had many more invitations than he could accept, but among those which he is to deliver are the following: Marquette high school, June 6; Clintonville high school, June 7; Horicon high school, June 13; Wood County Teachers' Training school, June 20. Among those he has already delivered are the addresses before the Peshtigo high school and the Green Lake county schools at Green Lake last Saturday.

President Roosevelt says there should be a graduated income tax. That is what the democrats say, and have said for some time past. The poor people would all be willing to see an income tax, but the fellows who are getting the incomes do not seem to favor the plan.

COUNCIL PROCEEDINGS

Council Rooms, June 4, 1907.

Council met in regular session, Mayor Wheeler presiding. Present, Alderman A. D. Hill, Stahl, Rowson, Niles, Ellis, Getzsch, Pantel, Borsert, Kubisak, Jackson, Ristow, Lyon, G. M. Hill and Hansen, 14. Absent Arpin and Derrich.

The reading of the minutes of the last regular meeting was, on motion, dispensed with.

The Street Committee to whom had been referred the petition of John Koldewa, on motion, to open up part of West Barker St., reported, recommending that the prayer of the petitioners be granted at this time and, on motion, the report of the committee was adopted.

The Street Committee to whom had been referred the matter of widening Oak and Vine Streets reported as follows:

Our Committee on widening Oak and Vine Sts., beg to report that we have no report to make on Vine St. at this time. On Oak St. we find the McCarthy place, the place for \$1,000.00, and the place can be bought for \$1,000.00. We think the building on Oak St. would sell for from \$600.00 to \$800.00. Geo. W. Baker asks \$1,000.00 and 10 feet of the McCarthy place and he to move his own building. We have been unable to get a price on Mrs. Cooney's place.

We recommend to accept the Baker and McCarthy proposition and that the City Attorney endeavor to get a price on the Conney place.

On motion, the Committee's report was adopted and the committee instructed to get a better proposition and to report at the next meeting of the Council.

The Street Committee to whom had been referred the matter of obtaining a right-of-way west of the M. F. Fahrner place presented the following report which was on motion adopted with the understanding that the Street Committee will be given a right-of-way and that the City have the right of constructing sewers thereon.

On motion, the Committee's report was adopted and the committee instructed to get a better proposition and to report at the next meeting of the Council.

The matter of changing the plans of water mains to be laid through the Stange-Ellis Lumber Co.'s yards was left with the Water-works Committee.

The following resolution was presented, on motion, adopted by the following vote: Clerk calling the roll, Ayes, 14. Hill, Stahl, Rowson, Niles, Ellis, Getzsch, Pantel, Borsert, Kubisak, Jackson, Ristow, Lyon, Hill and Hansen, 14. Nayes, none.

and the Committee instructed to proceed with the construction of the sewer.

The Water-works Committee to whom

had been referred the petition of John Kausigroch for laying of the water main on the corner of Third Ave. in a westerly direction on Fremont St., a distance of 150 ft., reported that the amount to be received from the City water department would not pay the interest on the expense of the construction of the extension. On motion, it was voted to give Mr. Kausigroch free water rental for a period of three years, to him to pay all expenses of the construction of the water-works according to his petition.

The matter of changing the plans of water mains to be laid through the Stange-Ellis Lumber Co.'s yards was left with the Water-works Committee.

The following resolution was presented, on motion, adopted by the following vote: Clerk calling the roll, Ayes, 14. Hill, Stahl, Rowson, Niles, Ellis, Getzsch, Pantel, Borsert, Kubisak, Jackson, Ristow, Lyon, Hill and Hansen, 14. Nayes, none.

RESOLUTION

"RESOLVED, that the committee on sewers is hereby authorized, directed and instructed to lay and construct a sewer in accordance with the plans of sewerage of the City of the Chicago and St. Paul Railway Company's right of way on Gaynor Avenue to the Easterly along Gaynor Avenue to the Wisconsin River, same to be of No. One (1) sewer pipe, 20 inches in diameter, and the committee on sewers is hereby authorized and instructed to buy and lay all other material necessary to construct and build said sewer in order to construct and build said sewer.

And by Mr. Fahrner, Resolved, That one third of the cost of the construction thereof be charged to the sewer district thereof, and one third of the cost thereof be charged to the City at large."

There was presented the petition of Joe Hollmiller, et al., praying Your Honorable Body to lay and construct a sewer on the following described streets, to-wit:—concrete, at the intersection of Fourth Ave. North with High street and running thence north on said Fourth Street to Grant St., thence west on Grant St., two blocks.

On motion, by unanimous vote, the above petition was granted and the Committee on Sewers instructed to proceed with the work.

On motion, the plans for water mains, as previously authorized to be constructed, on Grant street were modified in that the main should begin at the intersection of Fourth Ave. and Fremont Street, thence north two blocks on Fourth Street, thence west two blocks on Grant Street.

Alderman Bostrom reported upon the number of street lights to the effect that there are now thirty (30) lights on the West Side and twenty-five (25) lights on the East Side.

The Committee on General Business was instructed to further look into the matter of the necessity of more street lights.

The Committee on Water-works was

on motion, instructed to confer with the director of Electric & Water Company for the purpose of revising the charges for pumping and street lights.

There was presented the petition of Ellen M. Lund, et al., praying Your Honorable Body to lay out and construct a highway four rods wide, connecting a highway four rods wide, extending from the NE 1/4 of Sec. 12-22-5 East and run north west two rods west on the one-eighth mile line, a distance of one-half (1/2) mile, to the southwest corner of the NW 1/4 of Sec. 13-22-5 East, and also for the SE 1/4 of Sec. 13-22-5, and also for the one-eighth (1/8) line end, on motion, the same was referred to the Street Committee.

There was presented the petition of Harold Arpin to the Council for the improvement of the Lyon Estate north of the Chicago & Northwestern Railway in Wisconsin between the highway and the Wisconsin River. The request was also made that a committee of three members be appointed from the council to meet with a committee from the Federation as a Park Commission for the purpose of mapping out a system of parks and for the care and improvement of those already established, and those which may be established in the future.

Motion made, seconded and carried that the Mayor appoint a committee of three members from the council to meet with two members to be appointed from the Federation as a Park Commission.

On motion, the Mayor appointed Aldermen G. M. Hill, Hansen and Ellis.

The Committee on General Business

to whom had been referred the petition of the ladies of the Federation of Clubs for the consideration of the building of a Library Building, also further improvement of the park near the T. J. Cooper residence and suggesting the same for park purposes, of that part of the Lyon Estate north of the Chicago & Northwestern Railway in Wisconsin between the highway and the Wisconsin River. The request was also made that a committee of three members be appointed from the council to meet with a committee from the Federation as a Park Commission for the purpose of mapping out a system of parks and for the care and improvement of those already established, and those which may be established in the future.

HARRY ORCHARD CONFESSES TO CHAIN OF AWFUL CRIMES

Slayer of Gov. Steunenberg Takes Stand in Haywood Trial and Relates Bloody Tale
—Alleges Miners' Leaders Were Instigators.

HARRY ORCHARD.
(Confessed Murderer of Gov. Steunenberg and Many Others)

Boise, Idaho.—Alfred Horsley, alias Harry Orchard, the actual assassin of Frank Steunenberg, went on the stand Wednesday as a witness against William D. Haywood, and made public confession of a long chain of brutal, revolting crimes, done, he said, at the instigation and for the pay of the leaders of the Western Federation of Miners.

New York city houses the largest and finest public school building in the world. It is of recent construction throughout and cost \$2,000,000. It has accommodations for 4,000 pupils.

Frankie June, who was born in 1878, is still alive and at work, and a good shot with the rifle, at Oporto, Portugal. He acted in the Portuguese army, which in 1870 opposed the invasion of the French under Napoleon.

Authorities on the subject have estimated that only about 100,000 survivors of the civil war have not been pensioned. Of the men who actually served in that struggle it is estimated that 752,000 are still alive today, and that out of this number 675,000 are on the pension roll.

Theodore N. Vail, who has been elected president of the American Telephone and Telegraph company of Boston at a salary of \$100,000, has risen to his present position from a former boy. He was born in New Jersey 62 years ago, and in his youth worked on a farm in Iowa.

Judge John V. Wright, of Tennessee, now an attorney in the general law office at Washington, who will be 80 years old in June, has been connected with public life for a greater period than any other living American. He is as energetic as vigorous as a man of 20 and keeps up with the times of today without forgetting what has passed him.

Prof. Todd is going to the Andes to look at Mars from a high elevation to see for himself whether it is inhabited. Suppose it is and a scientist on Mars tries to communicate with us. What complications will arise if in Mars the people shake their heads when they meet us and nod vigorously for no? Then there would be no comment starting fight for the scientists of the two planets.

We sometimes see in the city papers much fun poked at the country press for its insignificant personal items. "How is this from the New York Tribune?" asks the Ohio State Journal. "August Belmont with dandies tonight at the Belmont 'clubhouse'." This beats that from our rural contemporaries: "Last night, Billy Jones, dressed up in his Sunday clothes, was going somewhere—where?"

New Yorkers are 500,000 bushel of oysters last season, a bushel averages 200 oysters, so that at least 100,000 bushel oysters were eaten there between September 1, 1895, and the end of April. These figures mean \$2,000,000 "stew" or as many "fries." If the oysters had been placed in that form on hotel, restaurant or family tables, but that would be only two meals of oysters in a winter for every man, woman and child in the greater city.

Very few have ever seen the Kaiser on foot, except on his yacht, the Hohenzollern. He always drives or rides. The reason for this would be more apparent than it is were it not that he wears very thick-soled boots. His real height is five feet, five inches, so he is thus among Europe's shortest monarchs. But that is not the only reason why he appears so seldom on foot. He is partially paralyzed down his left side, and his left arm is almost useless. That is why in all his photographs his left arm appears limp.

Guns and swords in egg cases filled for Finland have been confiscated by the Swedish authorities, who were afraid they might hatch out a revolution.

Ellen Terry asks that her marriage be treated as a private affair. She is well established in her profession that she does not need the advertisement.

Theodore Gill, the world's greatest authority on fishes, works for the United States government for one dollar a month.

The recent appointment of H. G. Wells as Justice of the peace for Folkestone, England, recalls the fact that Robert Burns was gauger and Sir Walter Scott was a sheriff.

When Mrs. W. A. Clark, wife of the Montana senator, entertains in their Massachusetts avuncular home Mrs. Clark gives her guests a genuine treat in a harp recital.

Admiral Baron von Spann, the most distinguished naval officer of Austria-Hungary, will represent that country at the Hague conference.

plot and furnished the witness with money from time to time, he said. The plot failed because Horsley and Adams followed a carriage containing three women to the Peabody home and received suspicion.

Next came a plot to dynamite Peabody, and Horsley said they made a bomb, but gave the plan up at the suggestion of Haywood, who was in fear that they would all be arrested. He said he and Adams were told to lay off for a time, but meantime Peabody suggested that they kill Lyte Gregory, who had been a deputy sheriff and had given testimony against some of the members of the federation.

Orchard Ends Gory Tale.

Boise, Idaho.—Harry Orchard crawled his admissions of grave testimony against William D. Haywood, he made an explicitly detailed confession of the murder of Frank Steunenberg by an infernal machine.

He swore that the assassination of Steunenberg was first suggested by Haywood, was jointly plotted by Haywood, Moyer, Pettibone and himself, was financed by Haywood and was executed by himself after the failure of an attempt in which Jack Simpkins had participated.

Orchard lifted the total of his own murdered victims to 18, and detailed the circumstances under which he had killed his former Gov. Peabody, Judge Goldfarb, Judge Gabbett, Gen. Sherman Pohl, Dave Moffat and Frank Berney. Incidentally, he confessed to a plan to kidnap the child of one of his former associates.

Under cross-examination by the defense Orchard confessed guilt of the sordid social crimes of deserting his young child and wife in Ontario, fleeing to British Columbia with Hattie Simpson, the wife of another man, and committing bigamy by marrying a third woman at Cripple Creek.

Through the shocking details of murder plot, stories of secret bomb making, tales of man hunts with sawed-off shotguns and infernal machine weapons, the witness went on in the same quiet, offhand manner that marked his demeanor Wednesday. He spoke dropped to lower keys as the pitiful story of the long hunt for Steunenberg narrowed down to the last day and he told of the race from the hotel to the home to beat his victim with the death trap, and the meeting in the evening as the victim walked unconsciously to his doom.

Through the shock of the truth as he went down into the mud "high grading," and there discovered a quantity of powder. He reported this to Davis, and there, he said, began the plot to do violence to the state. He said the first attempt was a failure because the case was discovered him and his pal and drove them off, but later a conveyance was successfully fixed by which a discharged pistol set off a bomb and killed Superintendent McCormick and Foreman Beck. Five hundred dollars, he said, was the reward that had come before.

Tells of Revolting Crimes.

Orchard confessed that as a member of the mob that sacked the Peabody Hill and Sullivan mill in the Coeur d'Alene he killed one of the cases that caused the hue and cry to the giant explosion; caused the hue and cry to the death trap at the Vindicator mine, he confessed that after the strike began he went down into the mine "high grading," and there discovered a quantity of powder. He reported this to Davis, and there, he said, began the plot to do violence to the state. He said the first attempt was a failure because the case was discovered him and his pal and drove them off, but later a conveyance was successfully fixed by which a discharged pistol set off a bomb and killed Superintendent McCormick and Foreman Beck. Five hundred dollars, he said, was the reward that had come before.

Then came the journey to Denver, where the witness said he met Moyer, Haywood and Pettibone and entered their employ as assassin. He swore that Haywood had him \$300 for blowing up the Vindicator mine. Next came the making of two bombs that were tossed into the coal heap at the Vindicator mine, but were never heard from again, and then a digression to confess that before the successful attempt at the Vindicator mine he had informed the railway manager of a plot to blow up its trains carrying nonunion men. Next the prisoner related how he journeyed to southern Colorado as a guard to Moyer.

After the noon recess the witness told of his journey with Moyer and his return to Denver, where it was suggested, he said, that he kill Gov. Peabody. He said he picked Steve Adams to aid him, and together they stalked the governor between the capitol building and his home, trying for a shot at him with cut-off shotguns. Haywood and Pettibone were in the

work in the mines and joined the Western Federation of Miners again. The witness told of the plot to blow up the Vindicator mine. He confessed that after the strike began he went down into the mine "high grading," and there discovered a quantity of powder. He reported this to Davis, and there, he said, began the plot to do violence to the state. He said the first attempt was a failure because the case was discovered him and his pal and drove them off, but later a conveyance was successfully fixed by which a discharged pistol set off a bomb and killed Superintendent McCormick and Foreman Beck. Five hundred dollars, he said, was the reward that had come before.

Part of Peabody Bomb Shown.

The state Thursday began its cross-examination of Orchard's crimson tale by producing the lead casting of the Peabody bomb. Orchard identified it, swore that he brought it from Canyon City to Denver and then on to Wallace, where he gave it to a man named Cunningham. It was thrown into the river, and the state promised later to prove its recovery.

Haywood and his kinfolk listened quietly to the long recital and about their first show of feeling was one of amusement when Attorney Richardson began his onslaught and brought out Orchard's domestic crimes.

The courtroom was crowded again Thursday, many of the spectators being women.

Fire in Newspaper Office.

Knoxville, Tenn.—The plant of the Knoxville Sentinel was seriously damaged by fire Tuesday afternoon, the loss being estimated at about \$20,000.

LOW FARES KNOCKED OUT.

Cleveland Car Company Victor in Ohio Supreme Court.

Columbus, O.—The supreme court Tuesday in a decision in the suit of the city of Cleveland against William Reynolds, gave a great victory for the Cleveland Consolidated Railways company and a blow at low fares. The case was brought in the circuit court of Cuyahoga county and involved the validity of the street car franchises on Erie and Central avenues. The circuit court upheld the validity of the franchises of the Consolidated Railways company and the supreme court sustained the circuit court, thus knocking out the low fare franchises.

FATAL AUTOMOBILE COLLISION.

Albany, N. Y.—Clarence McKenzie, of New York, president of the Standard Brake company, was killed instantly and W. H. Mosher, a bicycle policeman of New York city, and W. H. Swan, of New Britain, Conn., chauffeur, were injured Thursday night when their automobile collided with an electric car.

Three Farmers Drowned.

Clement City, Mich.—Three farmers named Neil Ferris, Washington Griffith and Byron Bercher, all from Woodstock township, were drowned in Silver Lake three miles south of this village. They had been fishing from a small boat which was found floating upside down near the hats of the three men. Ferris could swim and it is thought he perhaps perished while trying to aid his two friends.

RAINEY Blamed for Deaths.

Kankakee, Ill.—The coroner's jury which investigated the deaths of Fred Hattig, of Reddick, and Austin Stockdon and John Frazer, of Danville, by the explosion of a car of gasoline at Reddick Thursday afternoon, held the Chicago & Southern railway responsible.

MADE COLLECTOR AT TOLEDO.

Washington.—The president Thursday announced the appointment of Gen. William V. McJunkin as collector of internal revenue at Toledo, O.

Julia Magruder Dying.

Richmond, Va.—Miss Julia Magruder, the novelist, had a slight rally Wednesday, but later her condition was pronounced hopeless and she may die at any moment. Miss Magruder has a disease of the heart.

Becker Won't Go on the Stage.

Milwaukee.—Maynard Sherburn Becker, of this city, has decided to decline the offer of \$1,000 a week to go on the stage. He will continue his duties as manager of Milwaukee until the end of his term, he says.

OMAHA Wins Water Plant Case.

Omaha, Neb.—Judge W. H. Munger, of the United States circuit court, Tuesday decided in favor of the city of Omaha the suit brought by the Omaha Water company to compel the city to purchase its plant at the price fixed by a majority of the board of appraisers, \$5,262,295.49.

GRAIN Elevator Burned.

Gainesville, Tex.—The grain elevator owned by the Cameron Milling company, was destroyed by fire Tuesday night. The elevator cost \$100,000; insurance, \$75,000.

Prominent Wisconsin Man Dies.

Marinette, Wis.—United States Postmaster, Horace Thompson, aged 49 years and well known throughout the state, dropped dead from heart disease.

Prominent Wisconsin Man Dies.

Marinette, Wis.—United States Postmaster, Horace Thompson, aged 49 years and well known throughout the state, dropped dead from heart disease.

Defaulter Teller Sentenced.

St. Louis—Charles F. Grotewold, defaulter teller of the Washington National bank of St. Louis, was sentenced Monday to five years' imprisonment by Judge Triebel in the United States district court.

KNOX AS FAVORITE SO

PENNSYLVANIA REPUBLICANS IN DORSE SENATOR.

National Administration is Praised and Convention Adheres to "Stand-Pat" Policy on Tariff.

Harrisburg, Pa.—The administration of Senator Knox for president, the nomination of John O. Sheatz of Philadelphia for state treasurer, and the adoption of a platform including the policies and administration of President Roosevelt were the net result of Thursday's Republican convention. The platform also commends the course of the Fifty-ninth congress, endorse the action of Senator Pennington and Knox and the Pennsylvania delegation, particularly in upholding the laws of President Roosevelt, declares adherence to the principle of protection to American labor, American industries and American products, commends the administration of Gov. Sturt, endorses the work of the reorganization of those who promoted by the alleged frauds in farm-lending and upholding the new state control.

Senator Knox remained away from Harrisburg during the convention, leaving his interests in charge of his colleague Senator Pennington. Mr. Pennington probably will head the Pennsylvania delegation to the next Republican national convention. Gov. Sturt will also be a member of the delegation.

Mr. Sheatz's nomination was the result of a conference between Senator Pennington and his lieutenant. The senator's original purpose was to support Senator Harry H. Cummins of Tribune, but many of his lieutenants suggested that Sheatz would be a stronger candidate and he finally agreed with them. Mr. Sheatz is very popular in his third term in the legislature and was chairman of the house appropriations committee in the recent session.

Wesley R. Andrews was unanimously selected chairman of the Republican state committee.

New York.—United States Senator Phineas K. Knox of Pennsylvania Thursday night announced his willingness to become a candidate for the presidency in 1908 should the Republican party see fit to nominate him. Senator Knox's position was made known in expressing his opposition to the action Thursday of the Republican state convention at Harrisburg, Pa., which endorsed him as a candidate for that office.

GREENE AND GAYNOR BEATEN.

Federal Court Upholds Verdict Punishing Contractors.

WOULD DONATE HOMESTEAD.

New Orleans.—The sentence of the Savannah court in the famous Greene and Gaynor case, involving over half a million dollars claim to payment contract work in the Savannah harbor was affirmed Monday in an opinion handed down by the United States circuit court of appeals Monday. The sentence is four years' imprisonment each and a fine aggregating \$675,000. Judges Sheely and McCormick handed down the opinion which was on appeal, and Judge Parker disagreed.

The first judgment in this case was found in Savannah in December 1899, so that Monday's decision came after seven years and nearly 80 months continuous fighting against government prosecution. Greene and Gaynor can now either apply for a re-hearing or go to the supreme court or a writ of certiorari.

WOULD DONATE HOMESTEAD.

Canton, O.—Justice Day, president of the National McKinley association, said Thursday that Mrs. H. G. Barber, of this city, sister of Mrs. McKinley, intended to donate the homestead of the late president and his wife to the memorial association if it could be purchased from the brothers and sisters of President McKinley and their representatives, to whom it passed under the will.

Justice Day said that the general act of Mrs. Barber was highly appreciated by the association and that he had no doubt when the association met in Canton on the 19th of June, Mrs. Barber's proposition would be accepted and arrangements perfected to keep the homestead and its contents in the same condition in which the president and Mrs. McKinley left it.

New Bull Terrier for Roosevelt.

Washington.—A new bull terrier has arrived at the White House as a gift to President Roosevelt, to uphold the canine championship, which "Pete" failed to do. It was sent by S. M. Smith of Collins, O.

Wealthy Cattleman Slain.

Coffeyville, Kan.—William Curtis, a wealthy cattleman, was killed early Wednesday on his farm in the Osage Nation, Okla., 35 miles from here. It is a quarrel with a young farm hand named Shadler.

STEAMER AVERILL ON THE ROCKS.

Ogdensburg, N. Y.—The Ruthann, a transatlantic steamer, ran on rocks near Alexandria Bay in trifling weather Thursday. The vessel is resting easy and making no water.

WOMAN LIQUOR FEE PAYS DEAD.

Lafayette, Ind.—Helen W. Gougar, the well-known temperance leader, died at her home Thursday. She was 70 years old and for years had been leading temperance agitator.

FATAL ACCIDENT IN COTTERY.

Wilkesbarre, Pa.—The hunting of an air motor at No. 14 colliery of the Pennsylvania Coal company, at Port Jernigan, Tuesday, killed two others and fatally injured two others and caused other injuries to eight more.

NEW ST. LOUIS FREIGHT YARDS.

St. Louis—William S. McClellan, general manager of the Terminal Railroad association of St. Louis, has announced plans for three new freight yards in St. Louis to cost about \$10,000,000.

SHOTS TWO, KILLS HIMSELF.

Pittsburgh, Pa.—Because they could not tell him the address of a young woman, Patrick Reardon, aged 27 years, shot Thomas Morton and M. M. Moorehead and then committed suicide Monday afternoon.

DEFECTING TELLER SENTENCED.

St. Louis—Charles F. Grotewold, defaulter teller of the Washington National bank of St. Louis, was sentenced Monday to five years' imprisonment by Judge Triebel in the United States district court.

AMONG CRANBERRY MEN.

EDITED BY J. A. GAYNOR.

Grand Rapids, Wisconsin.

Prof. C. L. Shear on Spraying.

The Fire Worm.

Summary of Prof. C. L. Shear's article on Spraying vines to prevent rot, scald and blight.

The cranberry blight, scald and rot are caused by parasitic fungi.

Spraying experiments have demon-

strated that these diseases can be con-

trolled by a proper application of

Bordeaux mixture.

To make the mixture effective it

must be carefully prepared and

thoroughly applied, with the addi-

tion of rosin-tarred soap or some

other spreading and adhesive mixture.

Carrots or partial spraying is worse

than useless.

At least two applications should be

made during the season. No interval

of more than fifteen days should

elapse between the applications. The

last application should not be made

earlier than August 15.

It is necessary to use at least four

barrels per acre at each spraying.

The fruit and vines must be thor-

oughly covered in order to protect

them.

The barrel and cart or barrel and

wagon spraying outfit, with two 20

foot lengths of hose, has been found

most satisfactory.

The cost per acre for spraying five

times during the season should not

according to the methods described

here, exceed \$15.

Notwithstanding the fact that last

year a crop was a profitable one very

few new bags will be planted this

year in Wisconsin.

The terminal buds on the uprights

are now sprouting. The season is over

two weeks later than last year.

Boston market notes cranberry as

follows:

Cape Cod ch. bld.,.....12.00 50 14.00

Common ch. bld.,.....12.00 50 10.00

Crates,.....2.00 50 4.00

This is a strong probability that

the cool weather and the shortage in

small fruits from the South, have

made the late spring trade in cran-

berries unusually good; and under

proper management, clean, sound,

fresh berries will find every year

ready sale at fair prices during the

spring months. The time is not far

distant when under better manage-

ment the best keeping varieties will

be held back for the spring trade.

Two pounds of salt to the square

rod will destroy "wood moss" and

four pounds of slackened lime to the

square rod will destroy sphagnum

moss.

ADDITIONAL LOCAL.

Miss Stella Laramie is visiting

Tomah expect to move to this city in

a few days and have rented part of

the W. J. Shea home on First Street.

Mr. W. L. Boyce and son left to-

day for Winona to attend the gradu-

ating exercises. Mrs. Boyce's niece

is one of the graduates.

J. H. Linderman, the hustling real

estate dealer, transacted business in

Ripon on Monday.

Mr. and Mrs. Oscar Grotteau and

two children spent Sunday at Ru-

binson visiting with friends.

Mr. Francis Uchting of Richwood

is a guest this week at the home of

his brother, Mrs. Otto Ronius.

Mr. Carl Olson and son Russel of

Ardenia are guests at the Kuntz home

for a few weeks.

Dr. D. A. Tolter left on Tuesday

for Milwaukee to attend the Masonic

Grand Lodge session.

Emil Rasmussen, who is employeed

in a drug store at Racine, spent Sun-

day with friends in the city.

R. R. Mullian of Parson is in the

city engaged in tuning pianos for

some of his regular customers.

Ed Daly, who has been making his

home in this city for some time past,

left Thursday for Duluth.

Hugh Goggin, who is a student of

Ripon college, is home to spend his

vacation with his parents.

Peter Solar of Kaukauna arrived

in the city on Monday to spend the

summer with his grandmother, Mrs.

Seth Reeves.

Mrs. Fred Pfeiffer has been confined

to the bed the past week with sick-

ness but is now able to be about the

house.

R. A. Weeks left on Tuesday for

Milwaukee where he will represent

the local Masonic Lodge at the Grand

Loge session.

Miss Alice Schorner is visiting

friends at Astland this week. Dur-

ing her absence she will act as brides-

maid for a friend.

Mrs. Wm. Palsson, now Tillie

Plante, of Canada is the guest of her

parents, Mr. and Mrs. John Plante

for a few weeks.

Mr. and Mrs. Frank Mazur drove

to Junction City on Sunday where

they spent the day with Mr. Mazur's

brother, who lives on a farm.

Mr. and Mrs. F. W. Schuler of

Chicago attended the Wimberly

Neboir wedding in Sigel on Monday.

They will spend a week at the Mo-

raposko home in Rudolph before re-

turning.

Continued from Last Week.

CHANMOOR

Haskell Rick and sister Mrs. L. Cohn of Waukesha spent last week on their march getting ready to spend the summer here as has been their custom many years.

Mrs. S. N. Whittlesey visited at

the C. A. Jasperon home at Port

Edwards Thursday and was accom-

panied home by her daughter, Mrs.

Charles Whittlesey of Margo, N. D.

Mr. and Mrs. Charles Jacobs of Port

Edwards were callers on the march

Wednesday, Mr. Jacobs remaining

to work on the Whittlesey place.

Timothy Foley and wife drove to

the W. H. Fitch home to spend the

day with Mrs. Foley's people.

Mrs. Thos Kells of Grand Rapids

was a guest at the Thos. Rozis

home the past week.

Rob. Rozin and wife entertained

their parents, Mr. and Mrs. Daniel

Rezin of Rudolph, uncle and auntie

Rezin and Mrs. Kells, Sunday, at

their pleasant marsh home.

Miss Mayme Sears, Clarence Sears

wife and sister, Emory Bennett, Carl

Giesinger, Gilman and Lillie Warner

and Albert Viertel attended a dancing

party at Vesper Saturday evening.

The three latter furnishing the music

for the occasion.

Mrs. James Gaynor and E. E.

Warner made a trip to town Tuesday

for material to repair culverts on the

farm.

Mr. and Mrs. Edward Kruger were

called to Mauston last week to the

funeral of the sick sister Mrs. Kruger

recently visited.

Rob. Rozin Jr., went to Rudolph

Saturday returning first of the week.

The young couple will live in this

city, Mr. Wichman having a good

position in the Oberbeck factory.

Their many friends wish them a

long and happy married life.

ALTDORF.

Last Friday, June 7th, occurred the death of Mrs. Hubert Schleg. Mrs. Schleg was born in Austria, Jan. 6, 1842 and came to this country with her mother, a widow, when eight years old. Mrs. Schleg was first married in 1864 and had two children both of whom died. Later she was married to H. Schleg. Five children are left to survive her and mourn her loss, they being Mrs. John Schleg of Grand Rapids, Mrs. Sigel, Matt of Grand Rapids, Mrs. Frank Wipfl and Mrs. J. E. Nacht of Chicago.

It is further ordered that application be made to the probate office in the probate court in the city of Grand Rapids for the removal of the estate of Mrs. Hubert Schleg.

It is further ordered that application be made to the probate office in the probate court in the city of Grand Rapids for the removal of the estate of Mrs. John Schleg.

It is further ordered that application be made to the probate office in the probate court in the city of Grand Rapids for the removal of the estate of Mrs. Sigel.

It is further ordered that application be made to the probate office in the probate court in the city of Grand Rapids for the removal of the estate of Mrs. Frank Wipfl.

Grand Rapids, Wisconsin, Wednesday, June 12th, 1907.

VOL. XXXIV, NO. 7

DRUMB & SUTOR, Publishers.

The Time, The Place and The Events.

The Time is Now, the Month of June and July

The place is Grand Rapids and the surrounding country.

The events are the terrible cyclones, tornadoes, windstorms and electrical storms you are reading of in every day's paper.

Thousands of dollars worth of property are being destroyed and hundreds of lives lost almost daily.

You cannot afford to risk losing your property without protection.

I will protect your city property against tornadoes and windstorms for the small sum of \$40 per \$100.00 for a term of 3 years.

Farmers I will protect your farm buildings against these same storms for 75¢ per \$100.00 for three years.

Or I will insure your buildings, stock, machinery, etc., against fire, lightning, tornadoes and windstorms for \$1.75 per \$100.00, for three years. No assessments. Can you afford to take the risk of losing your property without protection when good protection costs so little?

I also buy and sell Real Estate, loan money and make Abstracts of Title.

Primer Lesson No. 1.

The Sad Little Boy.

Why does the little boy look so sad? The little boy is sad because his Pa looks so seedy?

He should not look seedy? He has no right to look seedy.

Does the little boy's Ma look as seedy as his Pa? No, his Ma does not look so seedy but she is also very sad because his Pa looks so seedy.

Should Pa's clothes be seedy so soon? No they should not, but they were "Punk clothes."

Did Pa pay his good money for the "Punk" clothes? Yes.

Isn't it too bad? He should have bought one of those good KRUGER & WARNER suits, then he would not have been seedy.

Yes, and the little boy and his Ma would have been happy.

My, wouldn't that be nice for the little boy and his Ma?

Let us have Pa buy his next suit at Kruger & Warner's.

\$5 to \$28.

FEDERATED MEETING

Ladies Discuss the Matter of Beautifying the City. Paper on the Subject of Roads.

In the future it will be advisable to keep watch of the experiments that are being made with applications of crude oil and hot tar. Attention should be given to the king drags or split log drag.

Good roads will not only increase a farmer's income and add to the comfort of all who live or travel in the country, but they will add materially to the value of all rural property and of this increased value an important part will be due to the beauty of the roadsides.

The attractive parades were decorated with red roses and apple blossoms.

The charity refreshments served in the dining room equally gratified the eye and palate.

Mrs. Williams of Milwaukee and Mrs. Millisburgh of Chicago were among the out town guests.

The program consisting of papers on Roads, Parks, River Banks, Billboards, and City Improvements in general, was as practical as the social features were beautiful.

The address given by Mrs. Millsburgh in the evening at the Methodist church was interesting and valuable in its suggestions.

The following paper on roads is contributed by one of the members of the federation.

Good Roads

Under the general head of Rural Improvements, no subject is of greater importance than roads. A good road is, first of all, an aid to economy. It helps one team to do work that would require two or more on a poor road.

It enables a farmer to reach a market when it is best. With it he does not have to wait for good weather or for the road to be dry. It saves the wear and tear of horses, tools and men.

On a good road a team not only hauls a larger load but it travels fast. Such a road requires a small annual expense for repairs than a poor road.

A good road helps educate people. By its use one can see his neighbors often, can attend meetings, can travel over a wider region and see what is going on.

It can thus in his busines often take advantage of facts learned from others. A good road helps one to be sociable. It leads to contentment, prosperity, good citizenship and happiness.

What is a good road? In the first place, one that has easy grades.

It takes power to climb hills and money to grade through them, while it is comparatively inexpensive to go around. Here as in many other cases, beauty and economy go together.

Dr. Schenk, by making roads around the hills near Milwaukee on grades not exceeding five per cent, reduced the cost of improving a place of woods so it came within the amount received for the wood.

Previously, when the old roads leading up and down hill had been followed, the outlay for the improvement had far exceeded the income.

Next, it must be well drained. The earth under it should always be compact and solid. Rainfall and snow should be taken care of so that water from high land on one side of the road should not run across to low land on the other.

The water should pass under the road, thus insuring scientific construction. If some such system was in use in Wisconsin we would have well constructed roads.

The road itself should be made of suitable materials, materials hard and tough enough to bear the traffic and not easily worn away or ground into dust or mud.

Some gravel beds furnish good material. The pebbles of which gravel is composed are usually hard enough and if they are accompanied by the right amount of material for binding, and successive layers are applied, varying from coarse at the bottom to fine at the top, each layer being sprinkled and rolled, the resulting road should be a satisfactory road.

These districts are fortunate which contain a suitable stone from which macadam can be made. Lime stone is better than some gravels, but not so good as granite or trap rock.

A macadam road is made of lime stone and should be frequently sprinkled to prevent it from grinding up into dust.

People who live in cities and villages where the residents have been in the habit of paying special assessments for street improvements may be inclined to think that the owners of abutting property should pay the expense of a good road in the country, but a good country road lowers the price of farm products for city people at the same time that it increases the profits and comforts of those who live on farms.

It would seem, therefore, that a portion of the expense of constructing roads along the main arteries of travel should be borne by cities, counties and the state.

No road or street can be so well made as to require no further attention.

Doubtless you have all heard the proverb "a stitch in time" applied to roads. A neglected depression holds water which softens the material at the bottom, and each passing wheel removes some of this material. If the depression is neglected it becomes a large hole, though it might have been made with a shovelful of gravel or broken stone when it first appeared.

When the frost comes out of the ground in the spring, rats are apt to form there.

There is a time when these rats can be leveled with little expense, yet how often do we see this time requested so that the rats harder and are left to annoy people for weeks thereafter.

Papers, rubbish, stray bricks or stones are just as annoying in the country as in the city, and people in both places should learn not to scatter such things about.

The foregoing brief statement is based on the past experience with gravel and macadam roads in some places in this country and in most places in the countries of Europe.

It is the first step to be taken in

preparing to celebrate.

The members of SS Peter and Paul congregation are making big preparations for the celebration of the half century anniversary which will be held in this city on the 30th of June.

Committees have been appointed for the occasion and it is the intention to have some very impressive ceremonies.

Father Hugenroth will be assisted in the work by a number of other priests and Bishop Schwabach will be here to help in the services.

The attractive parades were decorated with red roses and apple blossoms.

The charity refreshments served in the dining room equally gratified the eye and palate.

Mrs. Williams of Milwaukee and Mrs. Millisburgh of Chicago were among the out town guests.

The program consisting of papers on Roads, Parks, River Banks, Billboards, and City Improvements in general, was as practical as the social features were beautiful.

The address given by Mrs. Millsburgh in the evening at the Methodist church was interesting and valuable in its suggestions.

The following paper on roads is contributed by one of the members of the federation.

CARE OF YOUNG CHICKS

Import Features in the Successful Raising of Poultry

There are many simple methods of raising chicks naturally with the exception of hatching. An ordinary sty box is three feet long by two feet high turned over on its side makes an ideal nest or coop provided some straw is added to the top to keep the water out. An board is used as a sort of shield for the front, so that nesting rains cannot blow in. At this front an ordinary sailor screen such as you can buy at any hardware store, put it on a frame the screen size of the front of your box and by fasten your chickens in at night. This is a safe place from a number of every kind and by closing the box in a way that the mother chick from within you will start to peck at the direction of the ribbon.

We have some food prepared mixed for the chicks especially made for them to eat. This is a good food for young chicks and the do it on it.

Now this will be no food that contains any kind of animal tissue or cracklings which is excellent. Old bacon and ham, the bacon fat or any kind of fats that have been left over in the bacon fat job to make an easy job to melt the bacon fat stone and melt it up. Some won't think this ground gravy would be in any good chick but we have never had any in fact the sharper the gravy the better they seem to get along with it as it lodges in the gizzard of a mill of us to grind the feed then allowing it to enter into the stomach.

When hens are confined in boxes of his kind while the weather is nice in the box will make a small little nest so that the chicks can go out but still retain the hen. They will stay up for a few feet but will come back constantly at the call of the mother and are free from cats or other vermin. They will find their way to the roosting time as well when sudden storms come up.

When chicks are started artificially no more than 50 should be given to my brooder regardless of size. If you expect them to mature and develop into prime when the greatest concern is in having sufficient numbers of chicks to properly raise your chicks to maturity and it is not practical to start them in from the brooder that they will become accustomed to one kind of feeding. The first 50 days have ever obtained when chicks were started and want to feeding size without eating them from the brooder or the position of the run. In fact the only way to make chickens grow is to be a com absolutely contented. The contentedness is almost inevitably fat and healthy while the one who is fat and dissatisfied is just the reverse and the same rule will apply to all branches of live stock. Any animal that is well cared for and is contented in its home will do well and give the very best results.

Brooders will often notice one two or three in a pen of mate. This are constantly trying to get at the others will never give a good account themselves and the same they are moved to some other quarters the better and the same rule applies to young chicks. If they are scattered with their quarters you can almost see them grow while it cramp crowded and filthy you will meet with disappointment.

VIGOR OF FOWLS

Can Be Judged Accurately During the Molting Period

John G. Watson relates to the vigor of fowls says: There is no per-
haps, at any time in the history of the world that will indicate the vigor of a fowl as the molting period. Fowls that molt in a very short time and hardly stop for a moment in the growth of new feathers will give a large record. On the other hand those that are long in their molting have not the vigor and strength to digest and assimilate food enough to produce the requisite number of eggs. If it is necessary to select fowls at some time during the year other than the molting period some indication of their egg-producing power is shown in their general conformation in selecting a hen for egg production her form will give some indication of value. A long and delicate fowl is to be chosen rather than one with a stout body, whose under line is not like a half circle. A strong, healthy, vigorous fowl usually has a long body, a deep chest with a long and quite a slight under line. Other fowls being those that have been hatched from the larger hatched fowls of the egg breeds are to be preferred. It is a rule that fowls bred for egg production are larger hatched than those bred for meat purposes. Whenever vigor and conformation form an important part in the selection of fowls for breeding the size of the fowls is invariably important.

KEEP DRINKING WATER CLEAN

Handy Cover Which Can Be Used Over the Flat Dish

A drinking dish protector in the poultry yard is the next best thing to a drinking fountain for keeping water clean for the Oranges, Judd Farmer. The dish should be of crockery so as to last. The protector illustrated herewith is made of two one-foot squares of board. One is sawed across diagonally and the other hinged to the two triangular pieces thus formed.

Save the Lambs and Pigs. Save the lambs, save the pigs. The ewes and sows will need some green food at this time or at least some grain and hay. If the doves are kept open and appetites good there won't be much trouble with the young lambs when they arrive.

Moisture in Hen House. There is not as much danger of finding moisture on the walls of old hen houses as there is in new ones. The reason for this is that when lumber four is seasoned the grain is closer and less moisture penetrates.

ON THE TRAIL OF THE AMERICAN MISSIONARY

By WILLIAM T. ELLIS

This Discussed American Journalist in Japan for the Purpose of Investigating the American Foreign Missionaries in Northern Japan

IN NORTHERN JAPAN

Report by Joseph B. Bowles, Sendai, Japan—Although my first tour by a family friend is now the center of a record crew from a condition of hunger and distress that called forth more than \$600,000 from warm-hearted Americans this region has now passed into a period of rare prosperity. The rice crops are 20 per cent above the average.

Even to the unfamiliar eye of a traveler passing through the country the miles and miles of rice fields in full gear present an appearance of plenty and prosperity. The rice plots look little better than a farm's edge, with a famous temple on one end and caves hundreds of years old, carved by the hand of man, hidden in Buddhist priests from the beginning of Sendai's story. The city is noted for its pro-creativity and for its thoroughly Japanese character. For instance, there is only one vehicle in the city to which a horse is driven and that is the priest's car. Of course there are more rice gods sold in the shop of Sendai during the last year than in any other season while the minor peasant is still, that the farmer was his punishment for having been negligent of the little fat man of this particular deity. So putting up the god in his home and placing charms in his field he worked like a beaver over the crop and then sat down to his pleasures. The American Yama, the Christian association sacrifices met last summer at a little seashore village near Sendai and literally the entire community turned out to welcome them living up along the road and the school children to the feathered envoys.

When Mr. Lloyd Griscom, the former United States minister to Japan visited Sendai the city flocked like in the lavish fashion which only the Orient can afford. The students have been working hard and are free from cats or other vermin. They will find their way to the roosting time as well when sudden storms come up.

Advertising Rates.—For display, matter a flat rate of \$1.50, which is charged. The column in The Tribune are free, making a one-half page advertisement cost \$2.00 for one insertion. All local notices, cards of thanks, resolutions of respect, and all notices of entertainments, where an admission fee is charged will be published at 5 cents per line.

The Drift to Radicalism.

As a result of the introduction of universal suffrage the Socialists made heavy gains, Tuesday in the Austrian elections. The general political current toward Socialism or semi-Socialism which had pervaded the rest of Europe was bound to rise to the surface in Austria as soon as the working classes were admitted to the suffrage.

The spirit of the times can neither be ignored nor suppressed. Everywhere the tendency is toward legislation in favor of the workingman and the poorer masses and against more capital. Sympathy with labor is not only pronounced at the polls but finds expression in laws and methods of administration. Under the newer forms of industrial growth democracy is taking this turn. No government pretends to exist by popular support without making concessions to the workingman and seeking to promote their welfare.

In Great Britain the Liberal Ministry under Campbell-Bannerman leans to radicalism in its programme of social reforms. Within the past year it has exempted the trades unions from financial damages, provided for the protection of employees in case of accident and declared in favor of old-age pensions and lighter taxes on earned incomes. In France Premier Clemenceau protects the rights of labor and the unions even when forced to deal vigorously with Socialist leaders who seek to overturn the present order of things by violence. Germany is semi-socialistic in government, but the Kaiser and Chancellor von Bismarck, although savagely opposed by the regular Socialist party, appeal to the workingman with measures of reform and progress in the hope of weaning him from Socialist influences.

It is absurd to imagine that the United States can be isolated. President Roosevelt frankly admits that if his ideas of state regulation of corporations and correction of trusts abuse do not prevail, capital must expect more radical treatment, but imposes on it the same obligation to respect the laws and the rights of others. To cry out against his general principle of equality as socialistic is to cry out against the spirit that is today animating the progressive political parties of all civilized countries, under whatever name they may mask their purpose of retaining popular support through popular reform.—New York World.

Disregarding the Law.

American Press.—The Monon railroad ignores the interpretation upon the rate law by the interstate commerce commission and continues to pay for its advertising in transportation.

The Mobile Register understands that several of the roads in the south are preparing to follow the Monon example in the belief that the commission has no legal right to interfere in a business arrangement between a railroad company and newspaper when such arrangement has absolutely no influence on any other provision of the act regulating railroads.

One of the local companies of Mobile, which withdrew all passes outside its own employees, has given an order to a printer for a sufficient number of certificates to meet the mutual business arrangements of exchanging advertising space for transportation.

There seems to be a growing sentiment throughout the state to have absolute Australian ballot system used at all elections of the state. The adoption of this system would do away with the casting of a straight ticket, but the voter would have to make a mark for each man he wished to vote for, which would indicate just how he stood on the matter. It is the complaint of many that often a man gets into office simply on account of his party carrying him in, while if the ballots had to be cast for him individually he would not be elected. Any plan that would get the sentiment of the voter would be what the people are looking for.

One of our exchanges complains that thousands of dollars are sent out of the state every year by young people who take courses in correspondence schools, when they could get the same instruction thru a correspondence course with the state university. It is possible that the university may furnish such courses, but the people should remember that the correspondence schools have spent a lot of money advertising, and they recognized the demand for such instruction so long before universities woke up to the conditions, that they got a long start in advance of their competitors.

Unknown Friends. There are many people who have used Chamberlain's Cough Powder with splendid results, but who are unknown because they have hesitated about giving a testimonial of their experience for publication. These people, however, are none the less friends of this editor. They have been making their household word by their personal recommendations to friends and neighbors. It is a good medicine to have in the home and is widely known for its cures of diarrhea and all forms of bowel trouble. For sale by Day Drug & Jewelry Co.

"The Old World and Its Ways."

Col. William Jennings Bryan announces a new book of travel entitled "The Old World and its ways," which recounts his recent tour around the world and his journeys through Europe. It is profusely and elegantly illustrated with 210 artistic engravings representing men and things seen in the various countries of the earth during that noted journey. The engravings are made from photographs taken by him or his party especially for this publication. It is the monumental literary work of his life, and is published under his special supervision. He has, by special contract with his publisher, made the retail price low down with the view to putting it within the easy reach of every reader and book buyer.

The book gives his experiences—what he saw and did—when he met and his impressions and conclusions. He made a profound study of man and things as he saw them in this noted journey around the world. He gives governmental, educational, religious and other conditions, from the standpoint of a student and one profoundly interested in all the people of the earth.

While Col. Bryan traveled as a private citizen he went with the prestige of having made two memorable contests for the Presidency of the United States, and he was everywhere recognized and understood as a great representative American, having a leading part in the direction of American affairs. He was given opportunity for observations never before accorded to any one traveling in private capacity.

If one wants to see the world, and the people who are at the head of affairs in all countries, as well as the masses, he has in this book an opportunity of seeing them through the eyes of Col. William Jennings Bryan. It is sold by subscription, and the Thompson Publishing Company of St. Louis, Mo., are the fortunate publishers. They offer an especially inviting opportunity to solicitors in other columns of this issue.

Wood County Real Estate Transfers.

George H. Oxford and wife of the town of Rock to John Kaus of the same place on the 4th of May '07. SE 1/4 of NE 1/4 of Sec. 11 T 21 N of R 2 E. 40 acres. Consideration \$100.00.

They Go Hand in Hand.

A preacher came as a newspaper man in this way: You editors do not tell the truth. If you did you could not live; your newspaper would be failure. The editor replied: You are right and the minister who will at all times and under all circumstances tell the whole truth about his members, alive or dead, will not accuse his pulpit more than one Sunday, and then he will find it necessary to leave town in a hurry. The press and the pulpit go hand in hand with whitewash brushes and pleasant words magnifying little virtues into big ones. The pulpit, the pen, and the grave stone are the great sin-making tributaries. And the great minister went away looking very thoughtful while the editor turned to his work, and told of the unsurpassed beauty of the bride, while in fact she was homely as a mud fence.—Ex.

Facts About the International Correspondence Schools of Scranton, Pa.

1. Capital invested \$1,000,000. 2. Cost of text books, \$1,000,000. 3. Amount spent on text books and instruction papers each year to keep them up to date, \$250,000. 4. Capacity of buildings at Scranton, 7 acres. 5. Cost of buildings \$50,000. 6. Number of Courses 206. 7. Number of students one million.

Advantages of the I. C. S. System.

1. You do not have to leave your home to secure an education; the education comes to you.

2. You can keep right on with your work and study during spare hours. Our courses make odd moments profitable.

3. Our schools never close. You can begin to study when you please, and take your own time.

4. You can move from place to place while studying. We have students in every country.

5. You have lost books to buy. We furnish all instruction, papers, return envelopes and information blanks.

6. Our papers have been written especially for Correspondence Instruction by men expert in both the theory and the practice of their professions.

7. The I. C. S. system is the only system that will enable you to combine education and experience by immediately using in daily work the knowledge gained through your studies.

8. Our courses begin at the beginning and are complete in their respective fields. They are thus adapted to the needs of both men with limited education and of technical graduates.

9. The prices charged are much smaller than the fees of other educational institutions. You can pay in monthly installments. We pay all postage on mail sent to students.

O. M. Crain, Rep.

W. R. Ward, of Dyersburg, Tenn., writes: "This is to certify that I have used Dr. F. L. Laxative Fruit Syrup for chronic constipation, and it has proven, without a doubt, to be a most valuable, practical remedy for this trouble, and it is with pleasure I offer my conscientious reference." Daly Drug & Jewelry Co.

Thirteen Year Locust.

This is the year of the "Horrible year" locust and southern and western states are likely to be overrun with the insect, according to the department of agriculture.

The agricultural department at Washington has issued a statement, however, saying that four for the safety of shade trees and orchards from the pest is unwaranted, as the actual damage will be slight except in the case of newly planted orchards and nurseries.

Will Visit This City.

Dr. Richard C. Hughes, president of Rock college is in great demand this spring for commencement exercises at various high schools. He has in many instances when he could accept, but among those which he is to deliver are the following: Marquette high school, June 6; Clintonville high school, June 7; Horicon High school, June 13; Wood County Teachers' Training school, June 20. Among those he has already delivered are the addresses before the Postigo high school, and the Green Lake county schools at Green Lake last Saturday.

ADVERTISED LETTERS.

Ladies, Camp, Miss Maypole; Larsen, Miss Jessie; Petersen, Miss Emma; Seals, Miss Pearl; Steven, Miss Amanda (2); Young, Miss Myrtle N.

Donora, Miss Mabel; Clark, M. M.; Davis, Grace; Don, George; Luke, Murphy; E. Reimus; Olas, H. (2); Vanwall, A. E.; Walker, Elmer; Webb, A. M.

Ladies, Danvers, Miss Mabel; Faith, Mrs. Albert; Gudy, Mrs. August; Seal, Miss Pearl; Thayer, John Green visited at Grand Rapids.

Auto, Miss Anna; Lutz, working at Whitling.

REMINGTON.

Augus Soebach returned home last Thursday from Tomahawk.

Miss Agnes Kannan a successful term of school last Friday in District No. 2, with a picnic which all enjoyed very much.

Mr. Hass returned from Wausau, where he has been the guest of her sister, Mrs. Myer.

Frank Jagodinski spent last Sunday with his parents.

Mr. Rhods and son Frank of Neoshoonay stayed at the same home.

Miss Anna Keenan of Duxterville visited with her sister a couple of days last week.

An All-Perplexing Question.

A prominent Grand Rapids young man received the following anonymous letter, written in a feminine hand, upon one of the leading topics of the day:

Grand Rapids, Wis.

June 1, '07.

My Dear — :

The time has come when I must ask you a question concerning something of great importance, the things of which has caused many sleepless nights, care and pondering days of anxiety. It is a subject of which I hesitate to speak to anyone as I know the whole community is completely upset at this time by the same trouble which bothers me. Many happy homes have been broken up by this same cause and yet, I must know the worst. I dare not even tell my mother for she is very old fashioned about such things and in my distress I appeal to you. It may surprise you some to have me turn to you so important a matter, but I feel that you are a good friend of mine—yes, you can understand me. I am asking a great deal I know and while you are considering the same I beg of you to set aside all care, all social sessions, and properly consider the question. I have to ask it, but I most come to the point, do you think it is time for us to put on our summer underwear?

You can't tell a woman's age after she starts. Her Rocky Mountain complexion is fine. She is round, plump, and handsome; in fact she is young again. 35 cents, Tea or Tablets. Day Drug & Jewelry Co.

They Go Hand in Hand.

A preacher came as a newspaper man in this way: You editors do not tell the truth. If you did you could not live; your newspaper would be failure. The editor replied: You are right and the minister who will at all times and under all circumstances tell the whole truth about his members, alive or dead, will not accuse his pulpit more than one Sunday, and then he will find it necessary to leave town in a hurry. The press and the pulpit go hand in hand with whitewash brushes and pleasant words magnifying little virtues into big ones. The pulpit, the pen, and the grave stone are the great sin-making tributaries. And the great minister went away looking very thoughtful while the editor turned to his work, and told of the unsurpassed beauty of the bride, while in fact she was homely as a mud fence.—Ex.

OUR COUNTRY CORRESPONDENTS

RUDOLPH.

Mr. and Mrs. Morgan were in Oshkosh on Thursday last week to consult Dr. Jarvis regarding Mr. Morgan's eyes. Mr. Morgan will have an operation in a few weeks.

Mr. and Mrs. A. Sutor and Mr. W. H. Chambers spent Sunday at the Louis Lycceans home.

Mr. and Mrs. Geo. Mouton and daughters spent Sunday at the E. J. Fuller home. Their daughter, Miss Ruth, departed from here for March Rapids to visit for some time with relatives.

Mr. and Mrs. N. Richards of your city spent Sunday at the Geo. Elliott home.

Miss Clara Jacoby has gone to Tomah where she will be employed by Mr. Olaf Oregan.

Wm. Tefana, who is employed at Port Edwards, had his right leg badly bruised last week while at work, laying him up for several days.

Medea A. I. Chambers and Warren were Grand Rapids shoppers on Saturday.

Rudolph will celebrate the glorious 12th this year in grand style and preparations are now being made for the event. There will be the usual sports, all to wind up with a brilliant display of fireworks and a big dance all afternoon and evening at the hall.

The stock fair on Thursday was fairly well attended. Many farmers were obliged to stay home on account of the backward season.

W. J. Clark transacted business in Grand Rapids on Saturday.

Mr. and Mrs. Fred Logue had a long walk on Saturday.

Our local home talent gave an entertainment at Pittsville Saturday evening.

Dwain Robinson, our mail carrier, purchased a new horse this week.

Mrs. R. A. Hobbs of Wausau visited the old P. Trotter place for a stock of general merchandise which he will be using.

W. J. Clark has been quite sick the past week but is now recovering.</p

HAVE YOU EVER
HAD A BANK ACCOUNT?

If not you are just the person we are looking for. We take special pains to explain all about it, and when you get started you will wonder how you got along before.

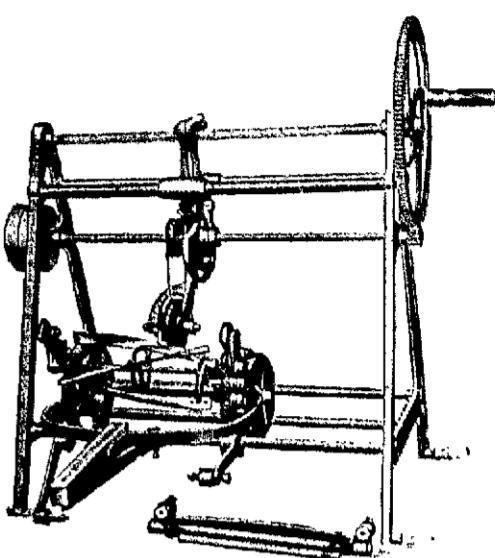

Don't make the mistake of thinking you must wait until you get \$100 or more, but start the account with a small amount.

Sharpen Your Lawn Mower

I have recently purchased a machine for the sharpening of lawn mowers which does the work in a manner that cannot be done by hand. A lawn mower sharpened by one of these machines is absolutely perfect, and will cut as good as a perfectly new mower. It never fails to give satisfaction. Bring in your mower and have it put into shape for the spring trade. The first time you pay your lawn will save enough backache to more than pay for the job.

F. BEADLE,
The All Around Handy Man.

Are Your Screens Up?

Fly time is here again and you certainly want your house protected.

You can't get the screens up any too soon. All kinds of screen doors \$1.00 to \$2.00. Wire netting adjustable screens—you need all of them.

And we want to remind you of the Adjustable Window Awnings. They are in the same class of creature comforts as screens. Let us take your order for them.

We also repair Screen Doors and screen windows. The work is done right.

"Do something different every day" advises a contemporary. At any rate, that is better than advising people to do somebody different every day.

However, demented bachelors is a much safer disease to have than brain storm or some of those others that only millionaires who hire strong experts can afford.

"Can a newspaper paragrapher enter heaven?" asks the Atlanta Georgian. Can't answer, says the Houston Post, but it is pretty certain that the other place can't risk him.

New York city boasts the largest and finest public school building in the world. It is of fireproof construction throughout and cost \$2,000,000. It has accommodations for 4,000 pupils.

Francisco, who was born in 1788, is still alive and at work, and a good shot with the rifle, at Oporto, Portugal. He served in the Portuguese army, which in 1819 opposed the invasion of the French under Napoleon.

Authorities on the subject have estimated that only about 100,000 survivors of the civil war have not been pensioned. Of the men who actually served in that struggle it is estimated that 782,000 are living today, and that out of this number 675,000 are on pension rolls.

Theodore N. Vail, who has been elected president of the American Telephone & Telegraph company of Boston at a salary of \$100,000, has risen to his present position from a farmer boy. He was born in New Jersey 62 years ago, and in his youth worked on a farm in Iowa.

Judge John V. Wright, of Tennessee, is now attorney in the general office at Washington, who will be 50 years old in June, has been connected with public life for a greater period than any other living American. He is still as vigorous as a man of 60 and keeps up with the things of to-day without forgetting what has passed and gone.

Prof. Todd is going to the Andes to look at Mars from a high elevation to see for himself whether it is inhabited. Suppose it is and a scientist on Mars is trying to communicate with us. What complications will arise if in Mars the people shake their heads when they mean yes and not vigorously for no? Then there would be no common starting point for the scientists of the two planets.

We sometimes see in the city papers much fun made at the country press for its independent personal items. "How is this from the New York Tribune?" asks the Ohio State Journal. "August Belmont will dance to-night at the Belmont clubhouse." This beats that local item in a rural contemporary. "Last night, Billy Jones, dressed in his Sunday clothes, was going somewhere—where?"

New Yorkers ate 500,000 bushels of oysters last season. A bushel average 200 oysters, so that at least 100,000,000 oysters were eaten there between September 1, 1906, and the end of April. These figures mean \$300,000 "stews" or as many "ries." If the oysters had been placed in that form on hotel, restaurant or family tables, but that would be only two meals of oysters in a winter for every man, woman and child in the greater city.

Very few have ever seen the Kaiser on foot, except on his yacht, the Hohenzollern. He always drives or rides. The reason for this would be more apparent that it is not, for he wears very thick-soled boots. His real height is five feet five inches, so he is thus among Europe's shortest monarchs. But that is not the only reason why he appears so seldom on foot. He is partially paralyzed down his left side, and his left arm is almost useless. That is why in all his photographs his left arm appears limp.

Guns and swords in eggs cases filled for Finland have been confiscated by the Swedish authorities, who were afraid they might hatch out a revolution.

Ellen Terry asks that her marriage be treated as a private affair. She is well established in her profession that she does not need her advertising.

Theodore Gill, the world's greatest authority on fishes, works for the United States government for one dollar a month.

The recent appointment of H. G. Wells as justice of the peace for Folkestone, England, recalls the fact that Robert Burns was a gauger and Sir Walter Scott was a sheriff.

When Mrs. W. A. Clark, wife of the Montana senator, entertains in their Massachusetts avenue home Mrs. Clark gives her guests a genuine treat in a harp recital.

Admiral Baron von Spann, the most distinguished naval officer of Australia, will represent that country at The Hague conference.

Now the green bug has begun to eat the young corn in Kansas. His bushy has the appetite of a bird maw.

Leather from old shoes is now ground up and mixed with a rubber solution and made into a rubber substitute.

Nikola Tesla says he can invent anything he wants to. Then let him get on an automobile that will consume its own smell.

It is always well to look on the bright side of things. The late spring has delayed the opening of the foot-sore-the-boot season.

San Francisco woman dropped dead while giving her husband a curtain lecture. Cut this out and take it home with you to-night.

London authority states the English girls "wink the left eye." That confutes the common impression that they wink the right eye.

Among the humors of the season is the report that Pittsburg is shocked at uncouth figures in a picture in the Carnegie Institute art rooms.

A college of foreign languages has been opened in Canton, China, the port from which most emigrants sail to distant parts of the globe.

"Do something different every day" advises a contemporary. At any rate, that is better than advising people to do somebody different every day.

However, demented bachelors is a much safer disease to have than brain storm or some of those others that only millionaires who hire strong experts can afford.

AMONG CRANBERRY MEN.

EDITED BY J. A. GAYNOR.

Grand Rapids, Wisconsin.

The Fire Worm.

The first brood of the black head fire worm commonly called fire worms are still in evidence. They have been feeding on the under side of the old leaves, but now are beginning to find a home in the sprouting terminal buds which they usually destroy.

To make the mixture effective it must be carefully prepared and thoroughly applied, with the addition of rosin-soap or some other spreading and adhesive mixture. Careless or partial spraying is worse than useless.

At least five applications should be made during the season. No interval of more than fifteen days should elapse between the applications. The last application should not be made earlier than August 15.

It is necessary to use at least four barrels per acre at each spraying.

The fruit and vines must be thoroughly covered in order to protect them.

The barrel and cart or barrel and wagon spraying outfit, with two 20 foot lengths of hose, have been found most satisfactory.

The cost per acre for spraying five times during the season should not, according to the methods described here, exceed \$1.50.

Notwithstanding the fact that last year's crop was a profitable one, very few new boys will be planted this year in Wisconsin.

The terminal buds on the uprights are now opening. The season is over two weeks later than last year.

Benton market notes cranberries as follows:—

Cape Cod ch. bbl., 12.00 to 14.00
Common bbl., 8.00 to 10.00
Crato., 2.00 to 4.00

There is a strong probability that the cool weather and the shortage in small fruits from the South, have made the late spring trade in cranberries unusually good; and under proper management, nice, sound, fresh berries will find every year a ready sale at fair price during the spring months. The time is not far distant when under better management the best keeping varieties will be held back for the spring trade.

Two pounds of salt to the square rod will destroy "wool moss" and four pounds of slackened lime to the square rod will destroy sphagnum moss.

ADDITIONAL LOCAL.

Miss Stella Laromie is visiting with relatives in Woodruff this week.

Miss Lillian Moyer has accepted a position in the office of City Clerk C. H. Boles.

Mr. and Mrs. B. G. Eggert spent Sunday and Monday with friends at Green Bay.

J. H. Lunderman, the hardware estate dealer, transacted business in Ripon on Monday.

Mr. and Mrs. Oscar Crotteau and two children spent Sunday at Appleton visiting with friends.

Mr. Frances Uehling of Richwood is a guest this week at the home of her sister, Mrs. Otto Roosius.

Mr. Carl Olson and son Rosel of Arcadia are guests at the Kuntz home for a few weeks.

Dr. A. T. Tellefson left on Tuesday for Milwaukee to attend the Masonic Grand Lodge session.

Emil Rasmussen, who is employed in a drug store at Racine, spent Sunday with friends in the city.

R. K. Mullian of Marion is in the city engaged in buying planks for some of his regular customers.

Ed Daly, who has been making his home in this city for some time past, left last Thursday for Detroit.

Hugh Goggin, who is a student of Simon college, is home to spend his summer vacation with his parents.

Peter Solar of Kaukauna arrived in the city on Monday to spend the summer with his grandmother, Mrs. Stet Roosius.

Mrs. Fred Pfeiffer has been confined to the bed the past week with sickness but is now able to be about the house.

R. A. Wanta left on Tuesday for Milwaukee where he will represent the local Masonic Lodge at the Grand Lodge session.

Miss Alta Schermer is visiting friends at Ashland this week. During her absence she will act as bridesmaid for a friend.

Mr. Wm. Faloma, nee Tilly Plank, of Canada is the guest of his parents, Mr. and Mrs. John Plank for a few weeks.

Mr. and Mrs. F. W. Schler of Chicago attended the Wissman-Nasbauer wedding in Sigel on Monday. They will spend a week at the Molapke home in Rudolph before returning.

Mr. and Mrs. Frank Mavor drove to Junction City on Sunday where they spent the day with Mr. Mavor's brother, who lives on a farm.

Mr. and Mrs. F. W. Schler of Chicago attended the Wissman-Nasbauer wedding in Sigel on Monday.

They will spend a week at the Molapke home in Rudolph before returning.

CEANMOOR

Mr. and Mrs. Thomas LaSarge of Tomah expect to move to this city in a few days and have rented part of the W. J. Sheen home on First Street.

Mrs. W. L. Boyce and son left today for Waupaca to attend the graduating exercises. Mrs. Boyce's niece being one of the graduates.

W. J. Corcoran, who is employed as cruiser by the Pigeon River Lbr. Co. at Port Arthur, is home for a visit with his parents, Mr. and Mrs. D. Corcoran.

Nikola Tesla says that he can invent anything he wants to. It is unfortunate that up to date he has never "wanted" to invent anything that would be of use to mankind.

To dress nearly is part of man's business. By consulting the Grand Rapids Tailoring Co. you can learn how to dress the neatest at minimum cost.

Mr. and Mrs. E. B. Reiford, who formerly occupied the M. Morris house on the west side, have moved into the Reining cottage on the east side.

E. L. Reess of Dodgeville was in the city on business on Tuesday. Mr. Reess was formerly cashier in the First National Bank at Marshfield.

Mr. and Mrs. Frank Mavor drove to Junction City on Sunday where they spent the day with Mr. Mavor's brother, who lives on a farm.

Mr. and Mrs. F. W. Schler of Chicago attended the Wissman-Nasbauer wedding in Sigel on Monday.

They will spend a week at the Molapke home in Rudolph before returning.

R. A. Wanta left on Tuesday for Milwaukee where he will represent the local Masonic Lodge at the Grand Lodge session.

Miss Alta Schermer is visiting friends at Ashland this week. During her absence she will act as bridesmaid for a friend.

Mr. Wm. Faloma, nee Tilly Plank, of Canada is the guest of his parents, Mr. and Mrs. John Plank for a few weeks.
